# SHANMUGARAJ D

**DEVOPS ENGINEER | AWS CLOUD | DOCKER | CI/CD | JENKINS | LINUX | GIT | TERRAFORM | KUBERNETES**

+91 7904206557 | shanmugaraj0523@gmail.com | linkedin.com/in/shanmugaraj-durairajan | github.com/shanmugarajshan

## PROFESSIONAL SUMMARY

Software Engineer with 3+ years of experience in application development, deployment, and DevOps practices, including hands-on experience in AWS cloud services, Docker containerization, CI/CD automation, Linux, Shell Scripting, and Git. Experienced in implementing automated build and deployment pipelines, managing AWS EC2 environments, configuring S3 and IAM services, and troubleshooting application deployment issues. Practical project experience with Jenkins, Terraform, Kubernetes, Docker Compose, and Nginx for Infrastructure as Code (IaC), container orchestration, and application delivery. Skilled in supporting Development, UAT, and Production environments, coordinating application releases, and improving deployment consistency through automation. Strong understanding of the software development lifecycle (SDLC), version control, cloud infrastructure, and DevOps methodologies, with a background in React.js and TypeScript application development.

## TECHNICAL SKILLS

- Cloud Platforms: Amazon Web Services (AWS), EC2, S3, IAM
- DevOps & CI/CD: CI/CD Pipelines, Jenkins, GitHub Actions, Build Automation, Deployment Automation, Release Management
- Containerization: Docker, Dockerfile, Docker Compose
- Container Orchestration: Kubernetes (Personal Project)
- Infrastructure as Code: Terraform (Personal Project), Ansible (Exposure)
- Operating Systems: Linux, Unix Shell Commands
- Scripting: Bash, Shell Scripting
- Version Control: Git, GitHub, Bitbucket
- Web Server & Reverse Proxy: Nginx (Personal Project)
- Code Quality: SonarQube (Exposure)
- Monitoring & Troubleshooting: Application Monitoring, Deployment Troubleshooting, Environment Troubleshooting, Log Analysis
- Application Development: React.js, JavaScript, TypeScript, REST APIs
- Development Tools: Visual Studio Code, Cursor

## PROFESSIONAL EXPERIENCE

### TELTH Healthcare – DevOps Engineer / Frontend Developer | August 2025 – Present | Salem

**Roles & Responsibilities**

- Responsible for DevOps operations, application deployment, release management, and CI/CD activities for healthcare applications across multiple environments.
- Designed, implemented, and maintained CI/CD pipelines to automate application build, deployment, and release processes, reducing dependency on manual deployment activities.
- Containerized applications using Docker, creating and maintaining container configurations to ensure consistent application execution across environments.
- Deployed and managed applications on AWS EC2 instances, utilizing Amazon S3 for storage and AWS IAM for access and permission management.
- Developed and maintained Linux Shell scripts to automate repetitive deployment activities, application configuration, and operational tasks.
- Managed source code using Git and GitHub, supporting branching, code integration, version control, and deployment workflows.
- Troubleshot application deployment failures, environment configuration issues, and production release errors to restore application functionality.
- Coordinated with backend developers and stakeholders to plan application releases, validate deployment readiness, and resolve environment-related issues.
- Supported the deployment and operational maintenance of the TELTH Care platform, including application updates and production issue resolution.
- Contributed to React.js and TypeScript frontend development when required, including bug fixes, reusable components, and application enhancements.

**Technologies:** AWS EC2, S3, IAM, Docker, CI/CD, Linux, Shell Scripting, Git, GitHub, React.js, TypeScript

### Samruva Technologies – Frontend Developer – React.js | March 2025 – July 2025 | Chennai

**Roles & Responsibilities**

- Developed responsive and reusable web application components using React.js, JavaScript, and TypeScript.
- Integrated RESTful APIs with .NET backend services, ensuring reliable frontend and backend communication.
- Improved application performance using lazy loading, memoization, and optimized state management.

- Used Git for source code management and collaborated with development teams on application integration, testing, and bug fixes.
- Participated in application debugging, functional testing, and feature enhancements to support production-ready software delivery.

**Technologies:** React.js, JavaScript, TypeScript, REST APIs, Git, HTML, CSS, Bootstrap

**Rasi Infotech – Frontend Developer – React.js | August 2023 – March 2025 | Salem**

**Roles & Responsibilities**

- Developed and maintained web applications using React.js, JavaScript, Redux, and Bootstrap for CRM, ERP, and E-Commerce platforms.
- Supported application deployment activities across Development, UAT, and Production environments using company-managed server infrastructure.
- Performed manual deployment activities, including application build preparation, server updates, configuration changes, and post-deployment verification.
- Investigated and resolved application deployment failures, configuration issues, and environment-related errors in coordination with development teams.
- Integrated RESTful APIs and collaborated with backend developers to support application functionality and production updates.
- Coordinated application releases, deployment validation, and troubleshooting activities to ensure smooth delivery of software updates.

**Technologies:** React.js, JavaScript, Redux, Bootstrap, REST APIs, Git, Application Deployment

## DEVOPS PROJECT

**MERN APPLICATION — End-to-End DevOps Deployment** - *Personal Project*

- Implemented an end-to-end DevOps workflow for a MERN stack application, covering source code management, containerization, CI/CD automation, cloud deployment, and infrastructure provisioning.
- Created Dockerfiles and Docker Compose configurations to containerize frontend and backend application components and maintain consistent deployment environments.
- Configured Nginx as a web server and reverse proxy to route application requests to containerized services.
- Implemented Jenkins CI/CD pipelines to automate application build and deployment activities using GitHub as the source code repository.
- Deployed application workloads to AWS cloud infrastructure and performed environment configuration and deployment validation.
- Used Terraform to provision AWS infrastructure resources through Infrastructure as Code (IaC) practices.
- Created Kubernetes Deployment and Service configurations to practice container orchestration and application workload management.
- Used Linux commands and Shell Scripting to manage application environments, troubleshoot deployment issues, and automate operational tasks.
- Applied Git-based version control, Docker containerization, Jenkins automation, Terraform provisioning, and Kubernetes orchestration as part of an integrated DevOps learning project.

**Technologies:** AWS, Docker, Docker Compose, Jenkins, Git, GitHub, Terraform, Kubernetes, Nginx, Linux, Shell Scripting

## SOFTWARE DEVELOPMENT PROJECTS

**ZINGER — Jewelry ERP System**

- Developed a web-based ERP solution for jewelry businesses, supporting sales, dealers, customers, lots, and product management.
- Built responsive application interfaces using React.js and reusable frontend components.
- Integrated RESTful APIs to support application workflows and data synchronization.
- Collaborated with backend developers to implement features and resolve API integration issues.

**ZINGER E-COMMERCE — Jewelry E-Commerce Module**

- Designed and developed an e-commerce module integrated with the jewelry ERP system.
- Built responsive user interfaces using React.js and Tailwind CSS.
- Integrated RESTful APIs for communication between frontend and backend services.
- Collaborated with backend developers to implement application functionality and improve business workflows.

**EN PROJECT — Project Management Tools**

- Developed dashboards and automated reports using CRM data.
- Built interfaces that helped product and customer service teams identify user trends and areas for improvement.

## EDUCATION

AVS College Of Arts & Science — Bachelor of Computer Science | Jun 2019 – May 2022 | Salem, Tamil Nadu
Kalaimagal Higher Secondary School — Higher Secondary School | Jun 2027 – May 2029 | Salem, Tamil Nadu

## CERTIFICATIONS

- DevOps Certification
- Java Full Stack Developer Certification
